# MapFactor Navigator 3.1 for iOS:
Expanded Coverage for a Worldwide Navigation

MapFactor, a renowned developer of GPS navigation apps, has recently released Navigator 3.1 for iOS devices, which includes a range of exciting updates. The update introduces a **unified app icon design** for both Navigator and Navigator TRUCK PRO apps on iOS, along with **expanded regional coverage for an enhanced global navigation experience**.

Key Updates in Navigator 3.1 for iOS Include:

1. Expanded Regional Coverage:

Traffic Information: Real-time traffic information is now available for Latin America, Middle East, North and East Asia, South Asia and Oceania.
With this expanded HD traffic coverage, users in new regions can benefit from up-to-date traffic information and plan their routes more efficiently.

Enhanced Map Coverage for Navigator PRO Users in Asia: Drivers using the Navigator Truck/Car PRO app in Asia can now enjoy tailored professional navigation in further countries.
The new professional maps cover 3 new territories in North and East Asia (Hong Kong, Macau and Taiwan) and 11 countries in the region of South Asia (Brunei, Cambodia, India, Indonesia, Laos, Malaysia, Myanmar, Philippines, Singapore, Thailand and Vietnam).
As a result, Navigator offers more than 200 territories worldwide with professional map coverage.

Filip Sarlej, iOS developer at MapFactor, commented, "*We are continually working to further develop our apps based on user feedback and technological advancements. With Navigator 3.1 for iOS, we've expanded our coverage to better serve our global user base.*"

2. Unified App Icon Design:
To streamline the user experience MapFactor has introduced a unified app icon design for all MapFactor Navigator apps. This ensures a consistent and recognizable look across both iOS and Android.

Availability

MapFactor Navigator and Navigator TRUCK PRO in version 3.1 for iOS are available for download on the App Store:
