

MapFactor Navigator Pro

The new professional iOS navigation app for cars and trucks

Detailed and optimised directions.
Based on the latest maps and live traffic.

Let us introduce you to our new iOS navigation app [MapFactor Navigator Pro](#) for iPhones, which has been **developed specifically for professional drivers of cars and large vehicles** like trucks, lorries, HGVs, LGVs, delivery vans, buses, motorhomes, caravans, campers, RVs. Routing is optimised for custom vehicle parameters and the current traffic situation.

The new app is **based on the popular offline GPS navigation app [MapFactor Navigator for iOS](#)** and can **navigate even without a data connection** using only GPS (TomTom maps are downloaded to your device).

Navigator Pro one-year subscription includes:

- Professional offline TomTom maps (Standard or Truck) with quarterly updates
- Live HD Traffic information
- Up to 3 alternative routes
- Head-Up Display feature
- Offline / Online search
- Truck restriction icons on the map and much [more](#)

The subscription offers a **major financial saving especially for professional drivers**, because it offers all of the paid features, live traffic and the latest professional maps. Specialised TomTom Truck maps contain advanced, truck-specific road data such as tunnel heights, bridge loads, narrow streets, and other large vehicle restrictions to make truck navigation even more reliable.

A **7 days free trial** is available for testing before payment is due.

Of course, there are all other common features from Navigator like waypoint optimisation, speed limit and camera warnings, favourite routes and places, points of interest (POI), UK post codes, remote communication with the dispatcher, customisation possibilities and much more.

MapFactor Navigator Pro is available now on App Store: <https://apps.apple.com/cz/app/mapfactor-navigator-pro/id1516687226>
