

## MapFactor Navigator Truck Pro

The new navigation app for trucks and large vehicles

We would like to introduce you to our new navigation app [MapFactor Navigator Truck Pro](#) for Android devices, which has been developed specifically for large vehicles like **trucks, lorries, HGVs, LGVs, delivery vans, buses, motorhomes, caravans, campers and RVs.**

**Routing is optimised for vehicle parameters** like height and width, **cargo** weight and **live traffic** updates.

The new app is based on the popular offline GPS navigation app [MapFactor Navigator](#) and can **navigate offline without a data connection** using GPS. TomTom Truck maps are downloaded to your device.

Navigator Truck Pro one-year subscription includes:

- Professional offline TomTom Truck maps for Europe and North America with quarterly updates
- Live HD Traffic information for selected countries
- Up to 3 alternative routes
- Head-Up Display feature
- Offline / Online search
- Truck restriction icons on the map
- App colour themes

The annual subscription **is a large saving for drivers**, because it offers a pack of all the paid add-ons and keeps you up to date with the latest professional truck maps, which contain advanced, truck-specific road data such as tunnel heights, bridge loads, narrow streets, and other large vehicle restrictions.

A **7 days free trial** is available for testing before payment is due.

It includes all existing features from Navigator like waypoint optimization, speed limit and camera warnings, favourite routes and places, points of interest (POI), UK post codes, remote communication with the dispatcher, map and app customisation and much more.

MapFactor Navigator Truck Pro is [available now on Play Store](#).
